LASER BAR CODE SCANNER

Microvision iMagic Inventory

MSRP \$359.95

Complete Inventory Control Without Breaking The Bank

Simple and Affordable Inventory Solution

Microvision iMagic Inventory users spend more time on value-creating activities for their businesses and organizations. Gaining control over inventory, invoicing, and reporting frees up time to sell, service, and support new and existing customers. Whether you need to automate the picking list and receipt process, track items that are selling briskly, or turn customer history into additional sales, iMagic Inventory is the solution. User-friendly iMagic Inventory software with helpful wizards will guide you through the stock control process. The fully integrated Flic Scanner saves you time and reduces errors. Unleash your full potential; spend less time on inventory management and more time on valuable activities.

Customers report that since implementing the solution they now have time to better understand and engage their customers, gain insight into their business operations, eat lunch away from their desk, even attend their children's soccer games.

Arthur Bittner, owner of BaysideDVD, uses Microvision iMagic Inventory solution to get, and stay, organized. He now reports spending less time getting organized, has reduced overall frustration and spends more quality time with his three daughters.

Chris Rizzoli, Building Maintenance Lead for the City of Pleasanton, uses Microvision iMagic Inventory to run a Central Store for purchasing custodial supplies, and other consumables that are distributed daily to multiple locations. Chris previously struggled with their nearly \$200,000 'user-hostile' Inventory Management system. Chris not only saves time by entering inventory items more easily, he is also able to train new users in less than 20 minutes.

"The Microvision iMagic Inventory Solution has streamlined how inventories are kept. This solution has great bar code tracking support that saves time. We gain more insight into our operation and now create meaningful reports. I can't believe a system this inexpensive provides this much value."

—Gianni Cellars

Whether you use the solution daily in a single location or have a distributed environment with multiple users, you will benefit.

What will you do with the time you save?

MICROVISION

LASER BAR CODE SCANNER

Microvision iMagic Inventory

Features

- » **Complete inventory and stock management**—Easy-to-use interface to enter stock details and manage inventory.
- » **Stock balance and reorder management**—Intelligent re-ordering system gives you complete control. Order new items in advance so they arrive when needed. Capture more sales due to better stock management, enabling JIT and decreasing holding costs.
- » **Fully integrated Flic Laser Bar Code Scanner support.** Save time and reduce errors by scanning stock.
- » **Quickly create invoices**—Easy access to customer details enables invoice creation.
- » **Maintain a client database**—It's easy to create personalized letters, mail merge them into your favorite word processor or email program, and send special offers to your customers.
- » **Warranty returns**—Manage replacement goods by sending out Warranty Returns Invoices.
- » **Group inventory items**—Use our unique Inventory Item Groups to merge commonly ordered items. Adding a predefined group will automatically add each stock item to an invoice and deduct the stock count.
- » **Pre-defined and custom reports available**—See the big picture, follow the long term trends. Analyze your invoices and track your sales. Remove poorly performing items before they become a burden. The fully featured reporting system lets you track sales over time allowing you to monitor the performance of your promotions and advertising quickly and easily.
- » **Create pick lists, receipts, import existing inventory, and more.**
